

## Carbon Footprint Answer Sheet

Character	Heating Fuel	Heating Quantity	Heating Footprint	Electric Quantity	Electric Footprint	Transport Fuel	MPG	Miles	Transport Footprint	TOTAL
Gary	Natural Gas	80	12,096	400	4,320	Gas	20	500	5,850	<b>22,266</b>
Andrew	Propane	200	30,720	450	4,860	Gas	30	600	4,680	<b>40,260</b>
						Diesel	25	400	4,301	<b>4,301</b>
Dinah	Propane	50	7,680	100	1,080	Gas	25	3,000	28,080	<b>36,840</b>
Eddy	Heating Oil	280	75,264	550	5,940	Gas	10	900	21,060	<b>102,264</b>
Heather	Heating Oil	150	40,320	500	5,400	Gas	10	400	9,360	<b>55,080</b>
Molly	Natural Gas	20	3,024	145	1,566	Gas	70	300	1,003	<b>5,593</b>
	Wood*	3	-							
Sandra	Heating Oil	250	67,200	350	3,780	Gas	25	600	5,616	<b>76,596</b>
Walter	Wood*	2	-	100	1,080	Diesel	15	1,000	17,920	<b>19,000</b>

\*Wood is considered carbon neutral. Although CO2 is released when we burn wood, it is carbon that has long been part of our carbon cycle, unlike the carbon that is released when we burn fossil fuels.
